

1. Project title: A unique way to improve road safety: car accidents analysis by machine learning
2. Project type: application oriented
3. Name of group numbers:
4. Description of dataset: UK 2016 Road Safety Data, provided by UK Department for Transport  
<https://www.kaggle.com/bluehorseshoe/uk-2016-road-safety-data/download>
5. Project description: The objective of this project is, by training machine learning models, generalizing hidden patterns underlaid thousands of car accident in UK, i.e. what are common features of most accidents, what are the main causes of the accident and what kinds of person might lead to accident. Hence, we can provide distinctive solutions to local authorities to, in some way, ameliorate the road safety in the near future.
6. Statement: I hereby certify I will not use these dataset(s) and algorithm(s) in any other courses, past, present or future. I understand that submitting overlapping material for more than one course is not allowed. This work is also not part of my thesis or capstone project research. I understand that any such action on my part will lead to a grade of INC being awarded for CSI5155 and may lead to academic sanctions imposed by the faculty of Engineering.
